

Grayling AVAIL glovebags deliver the highest performance because of **design features** that save labor while increasing safety. All AVAIL bags have; **FiberGuard** glovesleeves that ensure an air and liquid tight seal at this critical point, **latex work gloves** are extra large and flock lined for worker comfort.

Proper glovesleeve positioning lets the worker reach the insulation without having to support the weight of debris. This eliminates worker fatigue and therefore increases productivity.

Pre-cut tops with fitted-collars eliminate awkward cutting and measuring on the job. This allows the worker to attach the glovebag quickly and safely with no bunching of the bag where it attaches to the pipe.

Ultra strong virgin polyethylene ensure excellent viewing of the work area while yielding the highest seal quality. A **large drop-in tool pouch** is positioned for quick and easy access to your tools.

Entry ports allow safe, fiber and liquid tight attachment of the HEPA vacuum and wetting agent/encapsulant wand.

Grayling's patented **extended-run** design set the industry standard for efficiency in removing long runs of pipe insulation.

Only the **highest quality raw materials** are converted into AVAIL glovebags on state-of-the-art manufacturing equipment.

Then, the most **stringent quality control system** in the industry is employed to deliver the AVAIL glovebag line, consistently the most superior product available.

More contractors use AVAIL glovebags for asbestos abatement than any other bag. It is the **professionals choice** and the number one selling glovebag worldwide.

AVAIL™ Glovebag Specifications

Model #	Item #	Qty	Bag Dims	Pipe Dia	Glove Assy	Vert/Horiz	Packaging

Glovebag System
 for asbestos
 abatement
 from pipe

QuickTwist

1-2-3
Debris Chamber

QT14 This versatile size makes quick work of mid-size pipe insulation diameters safely and efficiently

Grayling's AVAIL QuickTwist Glovebag System

EASILY REMOVE, FIT AND TWIST-OFF FULL SECTIONS OF PIPE INSULATION

Grayling AVAIL brand glovebags enjoy the industry reputation of being the highest performing, easiest to use, and safest method to remove asbestos insulation from pipe. It is no wonder that more professionals choose AVAIL than any other brand. AVAIL glovebags have been used to remove over 50 million linear feet of pipe insulation.

The AVAIL QuickTwist model incorporates all the safety and labor saving features of other AVAIL glovebags, plus a new debris chamber design that makes it safer and easier for workers to twist off the waste area. The QuickTwist design has two distinct work zones, the removal area and the debris chamber. This two-stage design makes it safer and easier for workers to remove and securely separate debris-laden bags from pipe. The QuickTwist incorporates a larger work area with a narrower and taller debris chamber so that less bunching is required to twist close the glovebag. The increased work area gives the worker greater freedom inside the glovebag to access difficult pipe insulation. Each debris chamber is tall enough to handle intact sections of pipe insulation, less breakage of debris means lower fiber counts. After waste is funneled into the chamber, the worker easily twists it closed at the top and tapes the neck to prevent escape of dangerous fibers. The QuickTwist debris chamber is more puncture and tear resistant than any glovebag ever made. Made from PHD, a specially engineered polymer that incorporates all the strength and durability of low and high-density polyethylene.

All AVAIL bags come packaged in a convenient dispensing box that protects the unused bags from damage due to handling. The bags are on a roll and can be cut off and used in sections of 1, 2, 3 or more. 6 mil is standard construction.

QT10
The most popular, and versatile glovebag in the collection, the QT10 fits pipe diameters up to 10". It handles 40% more insulation than a 4460 style glovebag. This bag directly replaces the 4460 through 6060 style glovebags.

QT14
When larger diameters of pipe are encountered, the QT14 is a workhorse. It safely encloses pipe diameters from 10" to 14". A perfect replacement for the 6072 style glovebag.

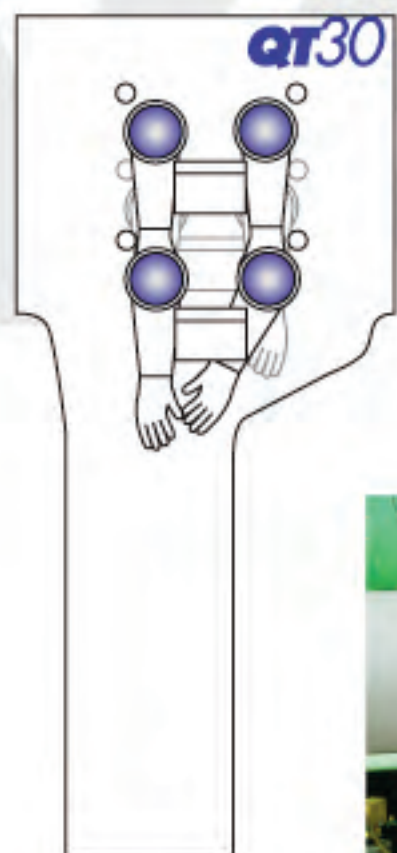

QT10 Dramatically increase productivity and safety utilizing the AVAIL QT10 glovebag on extended-runs of pipe.

Protected by US Patent Number 5759333

TM

QT18
Large pipe diameters from 14" to 18" are no problem for this QT18 model. Two sets of glovesleeves let the worker easily reach and remove pipe insulation. This bag is a direct replacement of the 6684 style glovebag.

QT30
This super sized AVAIL model handles pipe diameters from 18" to 30" and directly replaces the 72120. Ideal for larger pipes, valves and fittings where more work area is required. Three sets of glovesleeves let workers remove insulation on large diameter pipe.

The **QuickTwist 1-2-3** debris chamber makes it easy for workers to securely and safely separate debris laden bags from pipe. The new design incorporates a narrower and taller waste area so that less bunching is required to twist close the glovebag. After waste is funneled into the chamber, the worker easily twists it closed at the top and tapes the neck to prevent escape of dangerous fibers.

QUICKTWIST

6072 This glovebag with a larger work area is designed to handle pipe diameters from 10" to 14".

AVAIL Standard Glovebag System for Long and Short Pipe Runs

Grayling AVAIL brand glovebags enjoy the industry reputation of being the highest performing, easiest to use, and safest method to remove asbestos insulation from pipe. It is no wonder that more professionals choose AVAIL than any other brand. AVAIL glovebags have been used to remove over 50 million linear feet of pipe insulation.

All AVAIL bags come packaged in a convenient dispensing box that protects the unused bags from damage due to handling. The bags are on a roll and can be cut off and used in sections of 1, 2, 3 or more. 6 mil is standard construction.

Extended-run glovebags dramatically increase productivity and safety by eliminating multiple bag set-up labor and reducing jobsite fiber counts. The extended-run design is more efficient because it encloses a larger work area per bag and allows workers to remove more insulation than when used as a single bag.

4460EXT & 4460
The basic economy Avail glovebag encloses pipe diameters up to 8". Each chamber measures 44"x60" with one arm set per chamber, 6-mil construction. Available in the popular Extended-run design on a roll or as pre-cut single bags.

5460EXT & 5460
This full featured Avail glovebag sets the industry standard for efficiency on pipe diameters up to 10". Available in the popular Extended-run design on a roll or as pre-cut single bags. Each chamber measures 54"x60" with one arm set, and ports per chamber, 6-mil construction.

5460EXT Dramatically increase productivity and safety by utilizing the extended-run glovebag on long runs of pipe.

6072EXT & 6072
The Avail workhorse for larger pipe diameters from 10" to 14". Chambers measure 60"x72" with one glovesleeve set, port set, quick attach collars and 6-mil construction.

6684-2EXT & 6684-2
This Avail bag eliminates awkward bag twisting to reach around the pipe diameter with two sets of glovesleeves. Ideal for pipe diameters 14" to 18". Each chamber measures 66"x84" and has a port set, quick attach collars and 6-mil construction.

72120-2
This super sized AVAIL model handles pipe diameters from 18" to 30". Ideal for larger pipes, valves and fittings where more work area is required. Two sets of glovesleeves let workers easily remove insulation on large diameter pipes. Measures 72"x120" with a port set and 6-mil construction.

TM

6684-2 This glovebag allows workers to easily and safely access the work area with two sets of glovesleeves.

STANDARD EXT & SINGLE

AVAIL Special Application Glovebag System

Not all applications are long runs of horizontal pipe. These Special Application AVAIL glovebags make your workers more productive on difficult vertical pipe, small valves and large vessels.

The AVAIL M6 is the perfect bag for small maintenance and repair operations where the work is on small pipe, valves and gaskets. The M6 has pre-cut openings, collars and fiberglass glovesleeves like the other AVAIL models.

Avail glovebags for vertical applications improve worker productivity by design features which assist in the removal process. Debris weight and bulk is channeled away from the work area by the offset debris chamber. Awkward twisting and turning of the bag is eliminated due to the work area being seperated from the debris area.

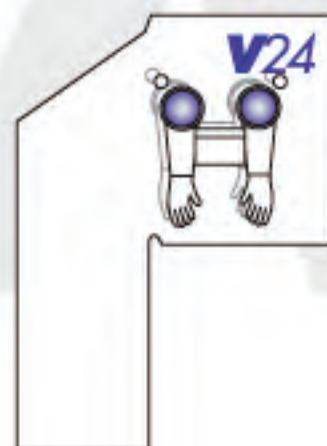

M6 The glovebag for repair and maintenance operations where the work involves small sections of insulation.

M6
The M6 is for repair and maintenance operations where the work is on small sections of insulation or gasket replacement. For pipe diameters up to 6". Each chamber measures 22"x60" with one arm set with opposing glovesleeves, 6-mil construction.

V10
This full featured Avail glovebag sets the industry standard for efficiency on vertical pipe diameters up to 10". Each bag measures 60"x84". An offset debris area moves the weight and bulk away from the work area. One arm set, and ports per chamber, 6-mil construction.

V24
Perfect for work on larger diameter vertical pipe, accomodates diameters from 10" to 24". Each bag measures 84"x96". An offset debris area moves the weight and bulk away from the work area. One arm set, and ports per chamber, 6-mil construction.

GSV12
This versatile vertical glovesheet is designed for floor-to-ceiling applications. Can also be used for ductwork and beams. The debris area is offset from the work area, flat dimensions are 8'x15' and is designed to enclose diameters up to 12". 6-mil construction.

GSH620
Designed for large horizontal pipe, vessels, ducts and beams. 3 debris chambers/chutes channel waste away from the work area. 8 arm sets make all surfaces accessible in the contained work area. Flat dimensions are 20'x12' and can enclose work areas up to 30" in diameter. 9-mil construction.

GSH1220
This extra large glovesheet enclosure is designed for large vessels and boilers. 14 arm sets make diameters up to 72" accessible in the work area. Flat dimensions are 20'x19' with 4 debris chambers/chutes to channel waste from the work area. 9-mil construction.

GSV12 Floor-to-ceiling mini enclosure for vertical sections of pipe, duct and beams

V10 The industry standard for work on vertical pipe. For pipe diameters up to 10".
