

SPECIFICATIONS

Product Description: **RESPIRATOR, FULL FACE HP**
 Part Number: **9902**
 Style: **SUPPLIED AIR**

GENERAL DESCRIPTION:

This comfortable full mask offers high pressure continuous flow protection with a unique over the shoulder hose design and an adjustable belt holds the hose and airflow valve out of the way. TC-19C-437

LENS:

- High impact polycarbonate (meets ANSI Z87.1)
- Wide field of vision with distortion-free replaceable lens
- Anti-fog and anti-scratch coatings
- Available lens peel-offs (P/N: 9901-25)

SUSPENSION:

- Non-slip durable rubber five point harness w/mesh hairnet
- Fits under hard hats
- Unique adjustable buckle system to lock in place

SEAL:

- Hypoallergenic and chemical/Ozone resistant
- Durable silicone rubber maintains shape while in storage
- Comfortable even in extreme heat and cold environments
- Double sealing flange and deep chin pocket for better face to mask seal

EXHALATION VALVE:

- Large diameter contoured exhalation valve design, for minimal breathing resistance
- Easily accessible for fast replacement and cleaning
- Removable cover protects the exhalation valve form dirt, paint spray and from freezing

DOWN TUBE & BELT ASSEMBLY:

- 90 Degree elbow allows it to be directed over the shoulder and out of the way
- Corrugated flexible and lightweight material for greater comfort and less fatigue
- Three options available: Flow Control Valve (20-50psi)(1.38-3.45 bar), Personal Cooler (50-85 psi)(3.45-5.86 bar) or Temp Controller (55-105 psi)(3.79-7.24 bar)
- Low profile nylon adjustable waist belt, (Included with high pressure controllers)
- Plastic clip to restrain airline hose from pulling on the face piece
