I. PRODUCT DESCRIPTION

Halt and Halt II are highly effective capsaicin based dog repellents designed to stop an attacking dog in its track. Halt products have been trusted by the United States Postal Service since 1966.

II. APPLICATIONS

Halt and Halt II spray an accurate stream up to 10 feet. A spray thru cap and built in belt clip make for quick access when needed. Use as directed on label, Halt will not stop a trained attack dog.

III. USER BENEFITS

- Stops attacking dogs (and other mammals) in their tracks
- Will not leave lasting effects on the animal
- Easy to carry and use
- Feel protected when outdoors
- Perfect for walking, hiking, running, and biking.

HALT!

**DOG REPELLENT FOR
PERSONAL PROTECTION
FROM DOG ATTACKS**

**HUMANE & SAFE
DOG REPELLENT**

U.S. Postal Service letter carriers have used HALT! products since 1966 to repel dog attacks. HALT! immediately puts an end to aggressive behavior, giving people time to move to safety. Capsaicin pepper extract, the active ingredient, results in extreme but temporary discomfort for an attacking dog but does no permanent damage. The spray can be aimed accurately from a distance up to 10 feet.

Safeguard outdoor workers from West Nile Virus, Lyme Disease, and the misery of itching with Bug Barrier II. The Centers for Disease Control and Prevention recommends insect repellents containing DEET¹, the active ingredient in Bug Barrier II. Higher concentrations of DEET offer protection for longer exposure times.

TICK STUFF

Biting insects may fly or crawl beneath clothing to reach untreated skin. For long-term defense against bites, mist outer clothing with TICK STUFF. Clothing treated with TICK STUFF repels and kills ticks, mosquitoes, and mites for two weeks. TICK STUFF contains permethrin, the active ingredient recommended by the CDC for use on clothing, shoes, bed nets, and camping gear¹. Permethrin is not intended for use directly on the skin.

Ticks that can spread Lyme disease now live in almost half of the United States according to the CDC²

Since the 1990s the number of reported Lyme disease cases in the United States has more than tripled²
